Detour scheduled I-295 ramp to westbound J. Turner Butler Boulevard

Jacksonville – Drivers traveling northbound on I-295 attempting to take J. Turner Butler Boulevard (JTB) westbound will be detoured Friday, June 23 from 10 p.m. until 5 a.m. Monday, June 26. The detour is necessary for construction crews to shift traffic along the corridor and improve mobility within the work zone.

Traffic will be detoured to JTB eastbound to Kernan Boulevard and be directed back to JTB westbound. Southbound I-295 and other JTB ramps will not be affected by this detour and will remain open.

This Florida Department of Transportation project consists of two new 12-foot travel lanes in each direction, the addition of noise walls along I-295 in various locations, the construction of drainage ponds and the installation of electronic tolling systems at various locations to collect tolls. The express lanes offer a choice for travelers to use the lanes for a fee, or remain on the non-tolled portion of I-295.

Express lanes are known as an “expressway within an expressway” where express lanes are separated from general use lanes. The toll rate for express lanes will vary depending on the amount of traffic within the express lanes. Generally, fewer cars using the lanes means a less expensive toll. Dynamic message signs will show the current toll rate. Due to electronic tolling cars are not required to stop to pay the toll and must have a SunPass or face a penalty.

The \$139.9 million project was awarded to the Archer-Western Contractors design-build team. The project is expected to be completed in the spring of 2019.
