

U.S. 17 from Horse Landing Road to Dunns' Creek Bridge

Dunn's Creek Channel Restrictions

Construction Project Alert:

As part of the Florida Department of Transportation's (FDOT) widening project on U.S. 17 from Horse Landing Road to the Dunn's Creek Bridge, channel restrictions will be in place January 2020 through March 2020, weather and unforeseen circumstances permitting. The restrictions are necessary to construct elements of the new bridge and fender system.

The horizontal bridge clearance will be reduced to safely stage equipment and perform work. During this phase of construction, pylons and beams will be intermittently suspended above the main navigation channel by crane.

Mariners are advised to proceed at a slow, no wake speed. Construction barges will be present with personnel on board on the north side of the channel. Barge workers will be monitoring VHF-FM channel 16.

Construction personnel will be present to guide boaters through the construction site using orange flags and hand signals when it is unsafe to pass through the channel.

GLF Construction began the \$36.5 million widening project in February 2018 and is expected to complete construction by summer 2021, weather and unforeseen circumstances permitting.

Contractor: GLF Construction

Expected Completion: Summer 2021 | Cost: \$36.5 million | www.nflroads.com | FIN# 435444-1
