Interchange improvements planned at I-95 and Airport Road

Jacksonville – The Florida Department of Transportation (FDOT) is scheduled to begin an interchange improvement project at Interstate 95 and Airport Road at the end of July.

Improvements at the interchange will extend from Airport Center Drive to west of Duval Road and will include:

- Widening the ramps and roadway of the interchange
- Roadway reconstruction at Duval Road and Airport Road
- Roadway resurfacing
- Drainage installation and improvements
- Sidewalk construction and repairs
- ADA upgrades
- Overhead sign installations

Traffic will be maintained in accordance with FDOT design standards throughout the project. Regulatory speed will be posted. Ramp closures and detours will be necessary during certain phases of the project, and drivers can expect periodic lane closures Monday through Sunday during the hours of 8 p.m. to 6:30 a.m. Flaggers and law enforcement officers will be present as needed for traffic control.

Watson Civil Construction Inc was selected to complete the \$11 million interchange improvement project by late 2019, weather and unforeseen circumstances permitting.

Motorists are encouraged to stay alert, adhere to posted speed limits, and travel within the limits of orange cones and barrels for safety.

For more information regarding construction projects, please visit www.nflroads.com or contact FDOT personnel at 904-831-FDOT.
