Traffic Advisory: Hart Bridge lane closure tonight and Friday to remove construction material

Jacksonville –In preparation for Hurricane Irma, the outside westbound lane of the Hart Bridge will remain closed, temporarily, from 7 p.m. Thursday September 7, until the early hours of Friday morning. All lanes of traffic are expected to be opened by 6 a.m. Friday morning.

The outside westbound lane closure will be reinstated beginning 9 a.m. Friday September 8, until crews complete the removal of construction material. The Friday lane closure is anticipated to extend until mid-Friday afternoon.

The removal of the material is precautionary to maintain the safety of both motorists and the bridge in the event of high winds. Similar precautions have been taken at various construction projects across the region.
